Chemistry at NMU

The Chemistry Department offers programs leading to either the bachelor of arts degree or the bachelor of science degree in biochemistry, chemistry, secondary education chemistry and water science, as well as graduate-level programs. The department also supports courses for students in other areas needing chemistry cognates and electives. The program for majors at the undergraduate level is designed for students planning professional careers in chemistry and related fields, and in the teaching of chemistry. There are several program options available at the advanced undergraduate level depending upon the career interests of the student.

Northern's Chemistry Department is accredited by the American Chemical Society. ACS approval and periodic reviews of the department's capability to offer complete programs to prepare students for professional work in the chemistry field attests to the continuing academic soundness of the undergraduate program and to its ability to serve the student population's diverse needs and interests.

The Chemistry Department also provides advisement for students interested in pre-pharmacy. See the "Pre-professional Programs" section of this bulletin.

- Chemistry Club/Moles "R" Us
- Student Michigan Education Association

Department/Program Policies

Students enrolled in a chemistry laboratory must pay the cost of replacement for glassware or equipment broken in excess of one dollar. Records of student breakage are maintained in the chemistry stockroom, and students are notified of any amount due after the last laboratory meeting. The breakage fee is not applicable to CH 490 or CH 491.

Only those chemistry courses passed with a grade of "C-" or better apply to the biochemistry, chemistry and Chemistry ACS Certified majors.

Students majoring in secondary education chemistry or minor-ing in chemistry education must maintain a grade point average of 2.70 or greater with no grade below a "C" in the professional education sequence, the major and/or minor and required cognates combined.

BACHELOR DEGREE PROGRAMS

Liberal Studies: Complete information on the liberal studies requirements and additional graduation requirements, including the health promotion requirement, is in the "Liberal Studies Program and Graduation Requirements" section of this bulletin (38-44).

Courses within each major that can be used to satisfy liberal studies requirements are listed with the Roman numeral (in brackets) that coincides with the liberal studies division the course falls under.

Biochemistry Major

This major prepares students for entry into graduate programs in biochemistry and related disciplines. The program serves those interested in biochemical research or forensic science as a career or in pursuing pre-professional programs in medicine or dentistry. The biochemistry curriculum includes the credit-hour equivalent of a major plus a minor; therefore, no minor is required.

**Students wishing to pursue graduate studies in biochemistry or industrial careers should take CH 341.*

4 **Chemistry Major (ACS Certified)**
 4

This major prepares students who plan to pursue graduate-level work in chemistry or to work in the chemical industry. Students who successfully complete this program will meet at least the minimum standards of the Committee on Professional Training of the American Chemical Society. Students in this major may satisfy the minor subject requirement by completing the sequence of courses listed as an academic minor in another department or completing the group science minor.

The group science minor uses the other required courses and requires three additional credits; see page 74.

Chemistry Major

This major prepares students for further work in areas outside pure chemistry such as forensic science, the biological sciences, medicine, dentistry, pharmacy, engineering, material science, pollution control or ecology. Students in this major may satisfy the minor subject requirement by completing the sequence of courses listed as an academic minor in another department or completing the group science minor.

Secondary Education Chemistry Major

Completion of the chemistry courses as well as the professional education sequence lead to certification as a secondary teacher of chemistry. Students in this program must select an academic minor in another department. A minor in physics education is recommended. Advising for this major is provided by Dr. Mitchell D. Klett in the School of Education.

Water Science Major

This major prepares students who are planning to pursue an advanced degree in oceanography, limnology, water chemistry, aquatic biology or environmental science. It also prepares students for state, federal and industrial positions related to water pollution and water quality. Students can select an adviser from either the chemistry or biology department. The water science major includes the credit-hour equivalent of a major plus a minor.
