Department Head: Neil Cumberlidge • cumberl@nmu.edu

Biology at NMU

The Biology Department offers programs leading to the bachelor of arts, bachelor of science and master of science in biology. The department offers four separate majors: biology, botany, zoology and biology/secondary education. Students with a biology major have the opportunity for further specialization by choosing from one of four concentrations: general biology, ecology, microbiology and physiology. The department also contributes course work to interdisciplinary programs in water science, biochemistry, environmental science, diagnostic genetics and science technologist. The department offers three minor programs of study: biology, human biology and biology education. The offerings complement programs in nursing, health, liberal arts and sciences, physical education, clinical laboratory sciences, and environmental conservation, among others. The courses emphasize fundamental concepts of biology at the subcellular, organismic and population levels. The laboratory courses provide students with first-hand experience in understanding biological concepts, thus furthering their understanding of life.

Biologists should have a knowledge of organisms at all levels ranging from molecular activities within cells to ecosystem dynamics. For this reason, the biology tracks and the botany and zoology majors are built around a common core of courses. The remaining courses for the major are selected to satisfy the student's interests and career plans. A strong background in the physical sciences is helpful to a biological career.

Student Organizations

- Pre-Dental Club
- Pre-Medical Club
- Pre-Veterinary Club
- Student Michigan Education Association
- Tri Beta Society
- Wildlife Society

Department Facilities

- greenhouse
- herbarium
- Lake Superior research boat
- Longyear Forest
- molecular biology facilities
- small-animal facility
- zoological collections

Department/Program Policies

A 2.00 grade point average is required for all biology courses taken for any non-teaching major in the department. Exceptions must be requested via petition to the department's academic programs committee. Students majoring in secondary education biology or minoring in biology education must maintain a grade point average of 2.70 or greater with no grade below a "C" in the professional education sequence, the major and/or minor and required cognates combined.

Students enrolled in biology laboratory courses must pay replacement costs for damaged supplies (e.g., glassware and microscope slides) or equipment (e.g., microscopes) having value in excess of one dollar. Records of assessments for damage are maintained in the department, and students are notified of any costs due no later than the last laboratory meeting.

Recommendation for Students Bound for Graduate School

Students who plan to apply to a professional school or pursue graduate work in biology are strongly advised to take Organic Chemistry I and II (CH 321, 322) and a year of physics.

Many graduate programs in the biological sciences, including the one at Northern Michigan University, require the Graduate Record Examination (GRE) for admission. Students intending to pursue graduate study in the biological sciences should take this examination early in their senior year.

BACHELOR DEGREE PROGRAMS

Liberal Studies: Complete information on the liberal studies requirements and additional graduation requirements, including the health promotion requirement, is in the "Liberal Studies Program and Graduation Requirements" section of this bulletin.

Courses within each major that can be used to satisfy liberal studies requirements are listed with the Roman numeral (in brackets) that coincides with the liberal studies division the course falls under.

General Biology Major

This major provides an opportunity for a diversified background in biology, applicable to a wide range of introductory positions of employment in business and industry, hospitals, universities, the military and government at the local, state and federal levels. It also provides excellent preparation for graduate work in biology or related sciences.

Total Credits Required for Degree	124
Liberal Studies	30-40
Health Promotion	2
Required Courses in Major	43-45
BI 111 Introductory Biology: Principles [III]	4
BI 112 Introductory Biology: Diversity [III]	4
BI 210 Principles of Ecology	4
BI 218 Introduction to Cell and Molecular Biology	4
BI 312 Genetics	4
BI 315 Evolution	4
<i>Choose from the following:</i>	4
BI 313 Cell Biology (4 cr.)	
BI 327 Animal Physiology (4 cr.)	
BI 431 Plant Physiology (4 cr.)	
<i>Choose from the following:</i>	4
BI 230 Plant Kingdom (4 cr.)	
BI 430 Plant Anatomy (4 cr.)	
BI 434 Plant Ecology (4 cr.)	
<i>Choose from the following:</i>	3-4
BI 221 Comparative Anatomy (4 cr.)	
BI 321 Embryology (4 cr.)	
BI 322 Vertebrate Zoology (4 cr.)	
BI 324 Invertebrate Zoology (4 cr.)	
BI 423 Parasitology (3 cr.)	
BI 424 Entomology (4 cr.)	
BI 427 Ecological Animal Physiology (4 cr.)	
BI 460 Ichthyology (4 cr.)	
BI 461 Herpetology (3 cr.)	
BI 462 Ornithology (3 cr.)	
BI 463 Mammalogy (3 cr.)	
BI 465 Aquatic Insect Ecology (4 cr.)	
<i>Choose from the following:</i>	5
BI 203 Medical Microbiology (5 cr.)	
BI 303 General Microbiology (5 cr.)	

Biology Electives	3-4
Any BI course at the 200 level or above except for BI 206 and BI 305 [III]	

Other Required Courses	28
CH 111 General Chemistry I* [III]	5
CH 112 General Chemistry II* [III]	5
Chemistry electives numbered 215 or above	8
PH 201, PH 202 College Physics I and II [III] <i>or</i>	10
PH 220, PH 221 Introductory Physics I and II [III]	

**Transfer students may satisfy this requirement with a minimum of 4 credit hours.*

Biology Major–Ecology Emphasis

This major provides a background for further study or for introductory positions of employment in fish and wildlife management, forestry, environmental science and other natural resource fields. Students interested in a career in wildlife biology should obtain information from the Biology Department on course selection for certification as an associate wildlife biologist by the Wildlife Society.

Total Credits Required for Degree	124
Liberal Studies	30-40
Health Promotion	2
Required Courses in Major	50-52
Core	
BI 111 Introductory Biology: Principles [III]	4
BI 112 Introductory Biology: Diversity [III]	4
BI 210 Principles of Ecology	4
BI 218 Introduction to Cell and Molecular Biology	4
BI 310 Ecology Theory and Methods	4
BI 312 Genetics	4
BI 315 Evolution	4
Physiology Elective	
<i>Choose from the following</i>	4
BI 327 Animal Physiology (4 cr.)	
BI 431 Plant Physiology (4 cr.)	
Conservation and Management Elective	
<i>Choose from the following:</i>	4
BI 240 Conservation Biology (4 cr.)	
BI 441 Fisheries Management (4 cr.)	
BI 442 Wildlife Management (4 cr.)	
Behavioral, Population and Community Ecology Elective	
<i>Choose from the following:</i>	4
BI 402 Microbial Ecology (4 cr.)	
BI 428 Behavioral Ecology (4 cr.)	
BI 434 Plant Ecology (4 cr.)	
BI 465 Aquatic Insect Ecology (4 cr.)	
Ecosystems Elective	
<i>Choose from the following:</i>	4

BI 410 Ecology of the Great Lakes (4 cr.)

BI 411 Limnology (4 cr.)

BI 435 Boreal Ecosystems (4 cr.)

Taxonomic and Organismal Biology Electives*Choose 6-8 credits from groups above or from the following:*

BI 230 Plant Kingdom (4 cr.)

BI 322 Vertebrate Zoology (4 cr.)

BI 324 Invertebrate Zoology (4 cr.)

BI 423 Parasitology (3 cr.)

BI 424 General Entomology (4 cr.)

BI 427 Ecological Animal Physiology (4 cr.)

BI 433 Boreal Flora (2-3 cr.)

BI 460 Ichthyology (4 cr.)

BI 461 Herpetology (3 cr.)

BI 462 Ornithology (3 cr.)

BI 463 Mammalogy (3 cr.)

BI 390 Field Experience (1-2 cr.)

BI 498 Directed Studies (1-4 cr.)

BI 499 Internship (1-6 cr.)

Other Required Courses

CH 111 General Chemistry I* [III]

CH 112 General Chemistry II* [III]

CH 220 Introductory Organic Chemistry (5 cr.) *or*

CH 321 Organic Chemistry I (4 cr.)

MA 171 Introduction to Probability and Statistics [V]

PH 201 College Physics I [III] *or*

PH 220 Introductory Physics I [III]

Electives*Choose from the following:*

GC 202 Soils (4 cr.)

GC 225 Introduction to Maps (2 cr.)

GC 255 Physical Geology (4 cr.) [III]

GC 335 Geographic Information Systems (4 cr.)

GC 401 Biogeography (4 cr.)

Transfer students may satisfy this requirement with a minimum of 4 semester hours.*Biology Major–Microbiology Emphasis**

This major is appropriate for pre-professional students in pre-medicine, pre-dentistry, and pre-veterinary medicine. It provides a foundation for introductory positions of employment in such fields as pharmaceuticals, manufacturing of biological products, and monitoring of health and environmental standards. It can also serve as a foundation for graduate studies in special areas of microbiology.

**Transfer students may satisfy this requirement with a minimum of 4 credit hours.*

Biology Major–Physiology Emphasis

This major is appropriate for pre-professional students in pre-medicine, pre-dentistry, pre-veterinary medicine, pre-optometry and physical therapy. It provides a foundation for introductory positions of employment in such fields as biomedical research, food and drug manufacturing, nutrition and sports physiology. It can also serve as a basis for graduate studies in developmental biology, physiological ecology, embryology and molecular biology.

CH 112 General Chemistry II* [III]	5
Chemistry Electives 200 level or above	8
PH 201, 202 College Physics I and II [III] <i>or</i> PH 220, 221 Introductory Physics I and II [III]	10

*Transfer students may satisfy this requirement with a minimum of 4 credit hours.

Secondary Education Biology Major

Successful completion of this major's biology courses and the professional education sequence leads to certification as a secondary school teacher in biology. Students in this program must select an academic minor in another department. A minor in chemistry education is recommended. Advising for this major is provided by Carolyn J. Lowe in the School of Education.

Zoology Major

This major provides a foundation for introductory positions of employment in museums, zoos, universities and state and federal agencies involved in fish, wildlife and other natural resource use. It is an appropriate program for pre-medicine, pre-dentistry, and pre-veterinary science students. It also provides a solid background for students who wish to pursue graduate studies in special areas of zoology.
