

Pre-Physical Therapy

Students interested in a career in physical therapy may choose any baccalaureate degree program at NMU, although students tend to select majors such as biology, physiology, or sport science. The pre-physical therapy adviser works with students to explore physical therapy graduate programs and the appropriate NMU coursework and practice experiences the students will need to meet prerequisites for the desired program. To meet most prerequisites of graduate programs throughout the country, students in the pre-physical therapy program take courses in biology, chemistry, mathematics, physics, psychology and the liberal arts. The adviser also helps students find internship or work experiences with local physical therapists.

NMU pre-physical therapy graduates have earned advanced degrees from a wide range of universities. NMU maintains an articulation agreement with Central Michigan University, which provides a non-competitive interview for admission into the doctoral program. To tailor this program to the student's career objectives, students should contact the adviser in the Biology Department .

- BI111 Introductory Biology: Principles (4 cr.)
- BI112 Introductory Biology: Diversity (4 cr.)
- BI207 Human Anatomy and Physiology I (4 cr.)
- BI208 Human Anatomy and Physiology II (4 cr.)
- CH111 General Chemistry I (5 cr.)
- CH112 General Chemistry II (5 cr.)
- MA115 Precalculus (4 cr.)
- DATA109 Intro to Probability and Statistics (4 cr.) or
SO208 Methods of Social Research I (4 cr.)
- PH201 College Physics I (5 cr.) and
PH202 College Physics II (5 cr.) or
PH220 Introductory Physics I (5 cr.) and
PH221 Introductory Physics II (5 cr.)
- PSY201 Psychological Research I: Statistical Applications (4 cr.) or
SO308 Methods of Social Research II (4 cr.)
- PSY210 Lifespan Developmental Psychology (4 cr.)
- PSY205 Introduction to Research Methods (4 cr.)
- PSY344 Lifespan Developmental Psychology (4 cr.)

See bulletin list for highly recommended courses

Pre-Physician Assistant

Northern Michigan University offers courses that prepare students for admission to many physician assistant programs. This pre-physician assistant program is similar to the pre-medical program because of the strong emphasis on basic sciences and requisite courses focused on the human body and functions. More advanced courses required for admission to a specific physician assistant program may vary widely depending on the school. Students may have any major but must complete the science courses required for entry to the programs to which they are applying. NMU has an articulation agreement with Central Michigan University's physician assistant program that allows for four NMU students to have a guaranteed interview with a high probability of acceptance into the program on a non-competitive basis providing the students meet all of the admission criteria in the CMU curriculum guide, and minimum GPA requirements. Courses required by CMU's curriculum guide are indicated with an asterisk. Admission requirements for applying include: cumulative GPA of 3.5, B or higher in any prerequisite course, recommendation by the Physics department, minimum of 100 direct patient care hours completed, community/volunteer service involvement, Graduate Record Exam (GRE) completed, and a passing score from an interview with CMU Physician Assistant Admissions Committee.

Pre-Engineering

Students interested in engineering who plan to transfer to an engineering school should contact the Physics department to get program details and be assigned an academic adviser. NMU offers courses from several departments that provide the foundations for engineering students. These courses, along with the liberal studies courses, comprise the first two years of study at most engineering schools.

Pre-Engineering Core

- CH111 General Chemistry I (5 cr.)
- CH112 General Chemistry II (5 cr.)
- CS120 Computer Science I (4 cr.)
- MA161 Calculus I (5 cr.)
- MA163 Calculus II (4 cr.)
- MA265 Calculus III (3 cr.)
- MA211 Intro to Matrix Theory and Linear Algebra (3 cr.)
- MA361 Differential Equations (3 cr.)
- PH220 Introductory Physics I (5 cr.)
- PH221 Introductory Physics II (5 cr.)

Full program details can be found at www.nmu.edu/bulletin

Pre-Professional Programs

Northern Michigan University offers a number of Pre-professional programs through various departments on campus. Although they are not academic majors, these programs provide relevant skills and program admission criteria to students wishing to further their education at other institutions. No degrees are awarded, however.

Advising for each of the Pre-Professional programs is given through the respective sponsoring departments, and is also offered during the entirety of the curriculum. This is to ensure that students and their faculty advisers share important information and avoid confusion regarding future enrollment at other institutions. Advisers will also help students entry into the professional program of their choice.

These programs are a great opportunity for students with specific career aspirations to get a solid start on their formal education. Because of the nature of the programs, a great deal of communication between institutions is required. The motivated student will initiate correspondence with respective institutions to ensure transition from school to school.
